

# Navigate Markets. Mitigate Risks. Accelerate Returns.

Abans Financial Services Ltd. (AFSL) is a diversified financial services institution, listed on the BSE and NSE, with operations across India, United Kingdom, Mauritius, Dubai and GIFT City. Since our incorporation in 2009, we have transitioned from a proprietary trading firm into a multi-asset, risk-managed platform offering investment, lending, and treasury solutions to institutional and high-net-worth clients globally.

At AFSL, we are building more than just financial solutions — we are shaping a cross-border platform rooted in compliance, agility, and long-term value creation.

From our origins in commodities trading, we have evolved into a diversified, SEBI-regulated financial institution. Today, we manage capital, enable investment flows and deliver performance across asset management, lending, and proprietary investment strategies — all under a single, integrated architecture.

FY 2024–25 was a year of deliberate expansion and quiet transformation. We unlocked new markets, scaled our flagship Global Arbitrage Fund beyond \$ 100 Million in Assets under Management (AUM), deepened our fee-based income engine, and secured strategic licenses across global jurisdictions. Each of our three business engines — Fee-Based Investment Services, Lending & Capital Solutions, and Investment & Treasury — moved from strength to scale.

**We don't just respond to market shifts — we anticipate them.**

**We don't chase growth — we design it with structure and foresight.**

**We don't speak in aspiration alone — we lead with data, discipline, and delivery.**

**Our journey is defined by a simple philosophy:**

Navigate markets with  
intelligence

Mitigate risk through  
design

Accelerate  
performance with  
purpose

As we step into FY 2025–26, we remain focused on building a durable, tech-enabled institution — one that doesn't just adapt to change but helps shape the future of Indian financial services on the world stage.
